EDPR agrees with First Solar to secure ~2 GWdc of solar modules for deliveries up to 2028

Madrid, March 30th 2023: EDP Renováveis, S.A. ("EDPR") announces an agreement with First Solar, Inc. ("First Solar"), the largest PV solar panel manufacturer in the Western Hemisphere with a fully vertically integrated manufacturing in the United States, to secure 1.8 GWdc of advanced ultra-low carbon thin film solar modules for EDPR's US projects, to be delivered up to 2028.

With this agreement, EDPR increases the weight of local content in US solar PV future projects and reinforces the diversification of its procurement strategy both in terms of supply chain and technology.

EDPR plans to add 4.8 GWac of solar PV capacity in North America in 2023-2026 (including both utility scale and distributed generation).

First Solar's thin film PV technology sets industry benchmarks for quality, durability, and environmental performance. This technology has significantly lower CO₂ footprint since its modules have the lowest carbon and water footprint of any commercially available PV module today, and excludes polysilicon from its components.

This information is disclosed pursuant to the terms and for the purposes of the article 17 of Regulation (EU) No. 596/2014 of the European Parliament and of the Council.
